## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Petengill in view of Leone.

The Petengill reference discloses an applicator comprising shafts 14a and 14b, brushes 13a and 13b, but does not disclose a bridge member and handle means. Instead, the shafts are connected by member 2. However, the Leone reference discloses a similar applicator including a bridge member 3 and handle means 2 connecting the shafts. It would have been obvious to substitute a bridge member and handle means as taught by Leone for the member of the Petengill applicator when so doing would constitute substitution of one known shaft connection for another in the art and the selection of any of these shaft connections would equally well in the Petengill applicator. Regarding claims 2 and 3, see the Petengill Figure and note that brush elements extend both upwardly and downwardly. Regarding claim 4, the Petengill apparatus further includes receptacle 11.

Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Petengill in view of Leone as applied to claim 4 supra, and further in view of Gueret.

The Petengill reference discloses an applicator as discussed supra, but does not disclose a gasket. However, the Gueret reference discloses a similar applicator including a gasket 21 for improved sealing. It would have been obvious to employ a gasket on the modified Pettengill device in view of Gueret for improved sealing.
